

Digitizing Oil Reserves

THE OPPORTUNITY

With over 1.6 trillion barrels of proven oil reserves globally, the oil & gas sector is still the largest natural reserve resource for energy consumption around the world.

With an optimistic oil price forecast, increasing demand and lack of production capacity, we have identified the opportunity to monetize proven oil reserves via Blockchain enabled technology.

THE PROBLEM

Oil & Gas has been historically a high-yielding, steady investment. However, the industry is plagued with numerous problems, including:

- Historically high financial barriers to entry, especially prohibitive upfront costs
- A low incentive for the offering company to offer superior returns or remain engaged
- "Radio silence" when problems arise, creating a lack of transparency between investors and companies
- Lack of liquidity due to long investment holding periods in Private Equity asset-classes

THE SOLUTION

BLOCKCHAIN FUELING THE NEXT OIL BOOM...

Majors like BP and Shell are already making headlines with plans to utilize blockchain technology to completely transform how energy is bought and sold.

Utilizing the power of smart contracts we now can:

- Break down the barriers to oil and gas investment,
- Decentralize direct investments with a permissioned access trust-protocol for stakeholders,
- Eliminate the upfront costs,
- Motivate offering companies to create more compelling returns and to stay engaged,
- Create complete transparency across the distributed ledger (blockchain) between investors and companies

PERMIAN TOKEN (XPR):

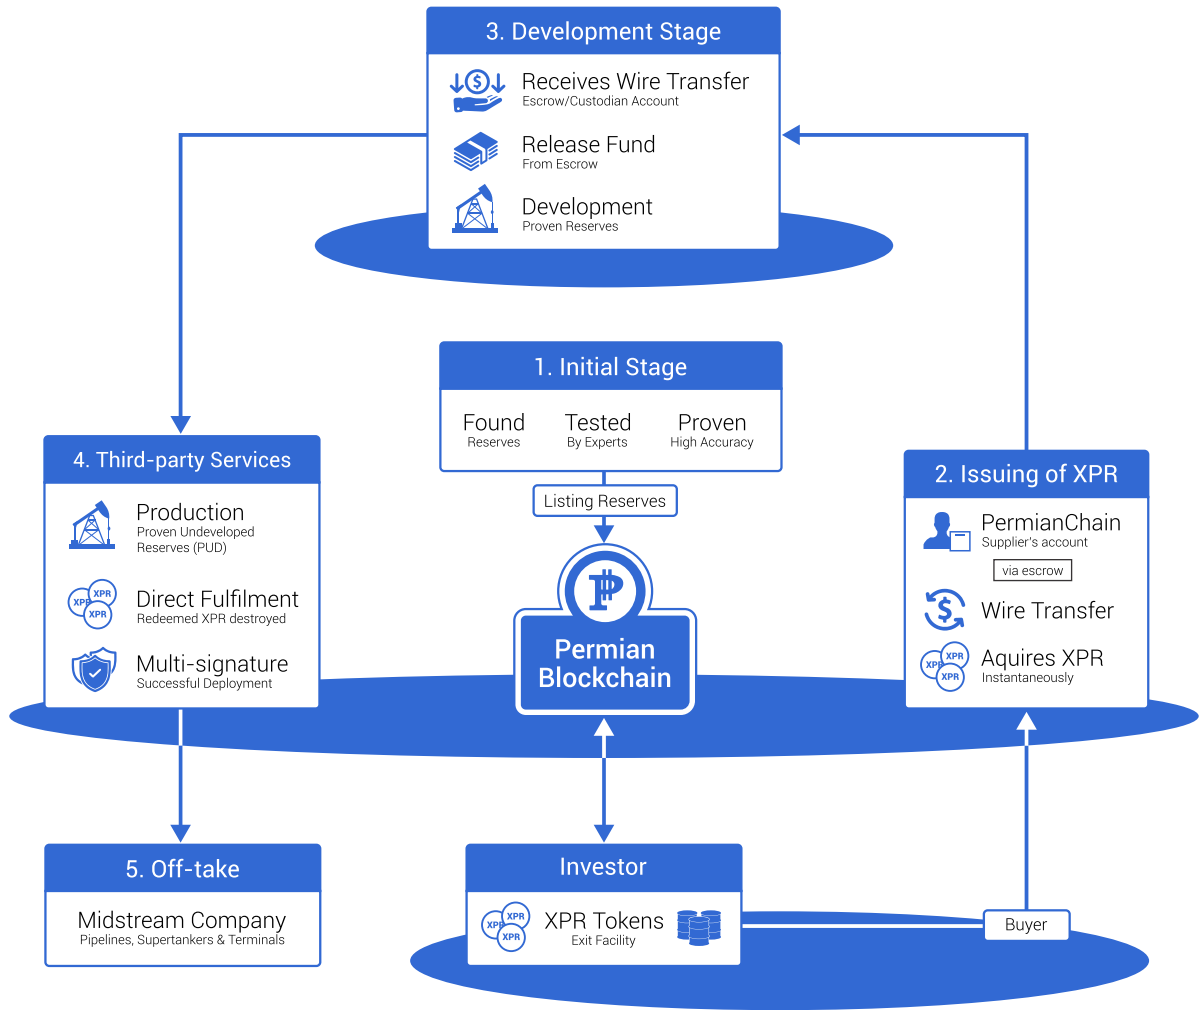

XPR serves oil producers by monetizing their oil reserves with our Closed-Loop-B2B-Exchange ("PermianChain") which functions as an ecosystem between buyers and suppliers, fueled by investors.

XPR can now serve as a reserve-backed digital token providing investors access to a widely inaccessible asset-class that is poised to take advantage of the expected surge in the price and production of oil reserves.

XPR EXIT FACILITY

XPR token holders and investors will have access to an Exit Facility on the PermianChain platform, allowing trading and liquidity of XPR tokens between investors and oil buyers (granting XPR holders rights on the value of proven reserves).

PERMIAN-CHAIN TECHNOLOGY
